Student Portfolio Checklist

Presenting projects and documenting your work

CampusConnect • Student Learning Resource

Profile

- Write a short introduction about your interests and skills.
- State your role accurately and include professional contact links you want to share.

Project selection

- Choose projects that demonstrate relevant skills.
- For each project, explain the problem, your contribution, technologies, and outcome.
- Add screenshots or a live demo where appropriate.

Documentation

- Include a README with features, setup steps, and screenshots.
- Explain how to install and run the project.
- Mention known limitations and possible improvements.

Code and deployment

- Remove secrets and private credentials from repositories.
- Check links and confirm the project builds successfully.
- Use clear filenames and meaningful commit messages.
- Test the deployed site on mobile and desktop.

Accessibility and final review

- Check navigation, labels, contrast, and keyboard focus.
- Make errors and loading states understandable.
- Ensure reviewers can tell what you personally built.
- Avoid including private user data.
